

Description

Lexan Exell D Solar Control IR Solid sheet is a member of the Lexan Exell D Clear sheet family. Lexan Exell D Solar Control IR solid sheet is a transparent polycarbonate sheet with proprietary UV protection on both sides offering excellent weathering properties and IR absorption with a light to solar gain ratio of 1.24 for the color GN9A047T and 1.18 for the color GN8A081T, resulting in outstanding heat management properties. With its excellent impact resistance it is ideally suited to a wide variety of building and construction applications. Lexan Exell D SC IR sheet can be easily cold formed into gentle curves which make it ideal for skylights, covered walkways, barrel vaults etc. Lexan Exell D SC IR sheets are thermo-formable and can be thermoformed into the desired geometry whilst retaining the UV resistant properties specially developed for weather resistant applications.
